

# *Combating antigypsyism: identifying possible measures*

EESC Brussels,

19 October 2023

Javier Sáez

# Measures to fight against antigypsyism from the experience of FSG:

## 1. Political advocacy, to advance in:

- Legal protection: Equal treatment law, regional laws, anti-gypsyism in the criminal code
- Institutional protection: Equal treatment body, specialized prosecutors, coordination between our entity and key agents
- Political frameworks: Roma National Strategy, Anti-racism action plan

## 2. Specialized care and empowerment of victims

Accompaniment of victims and training. Through an equality body, but also at a regional level with regional services and from now on with a specific program that will mean the continuation of what we have done with Calí II.

### 3. Studies and reports

Specific such as settlements, segregated schools, and annual discrimination reports: providing data.

### 4. Addressing anti-Roma hate speech and raising awareness against stereotypes

Monitoring, reporting, generation of counternarratives, social awareness, work with mass media

### 5. Strategic litigation

To defend the victims, improve jurisprudence and generate social change to overcome anti-gypsyism 32 cases open now.

Thank you
