

# 2009 Overshoot Day

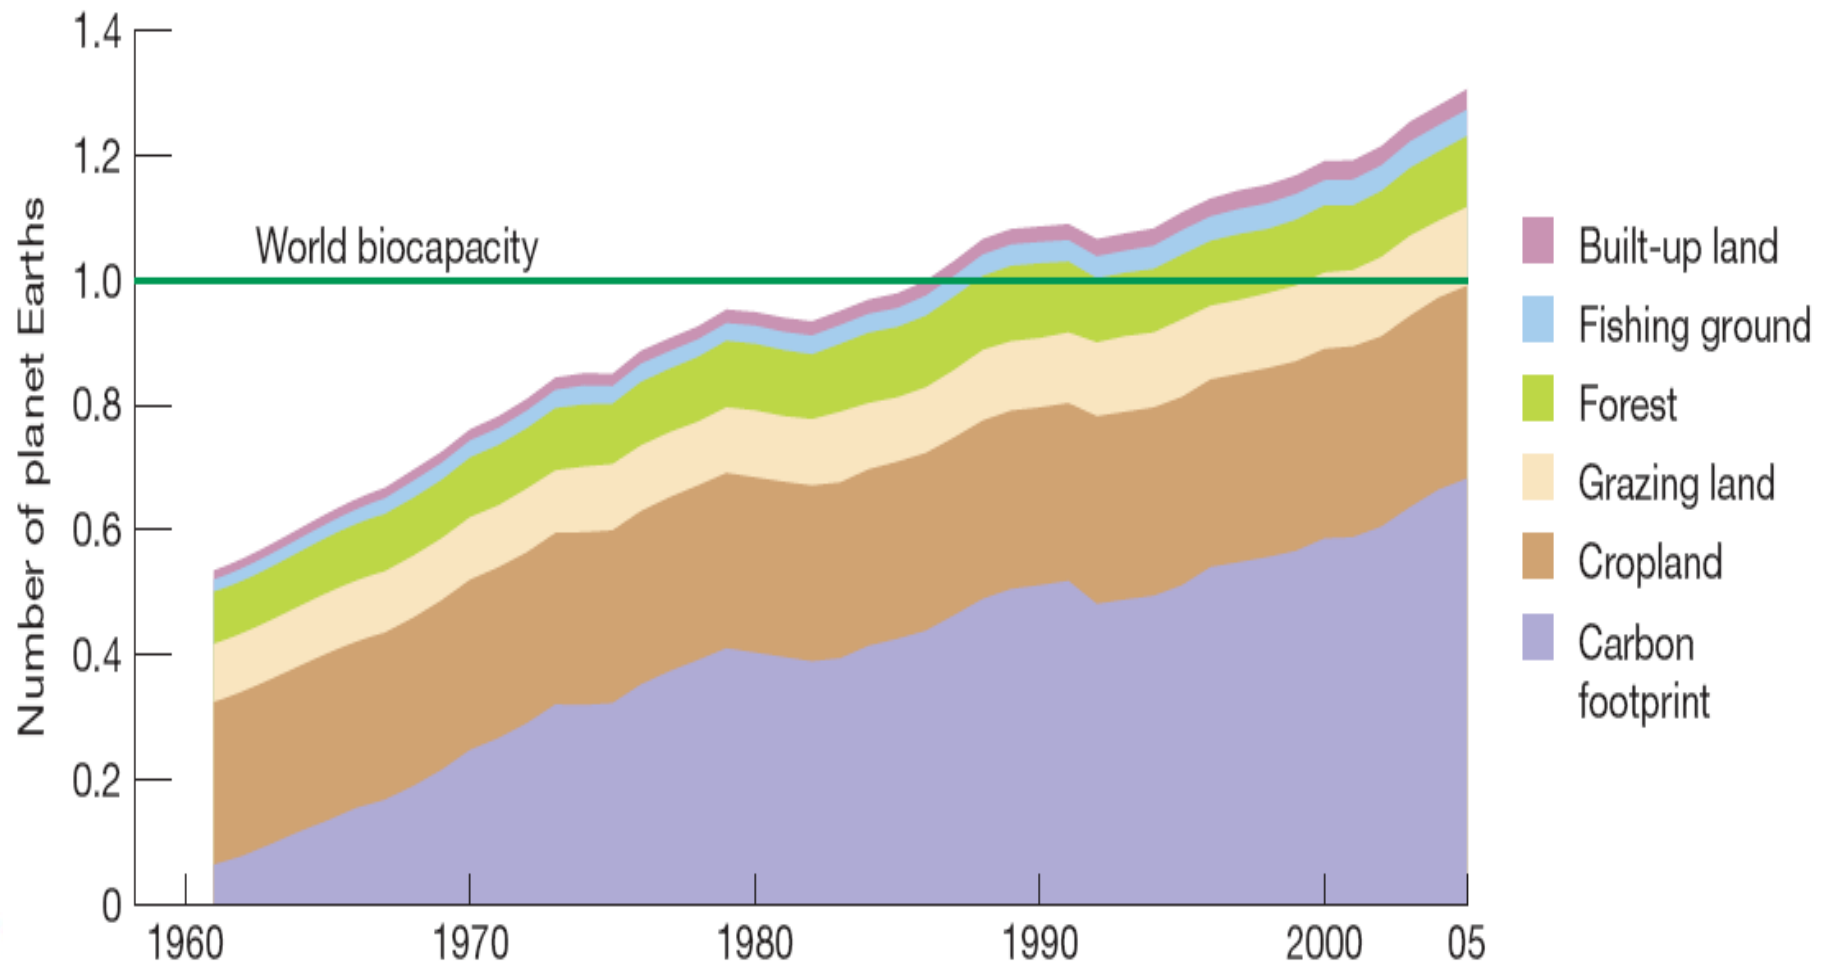

EESC – 22-25 September 2009

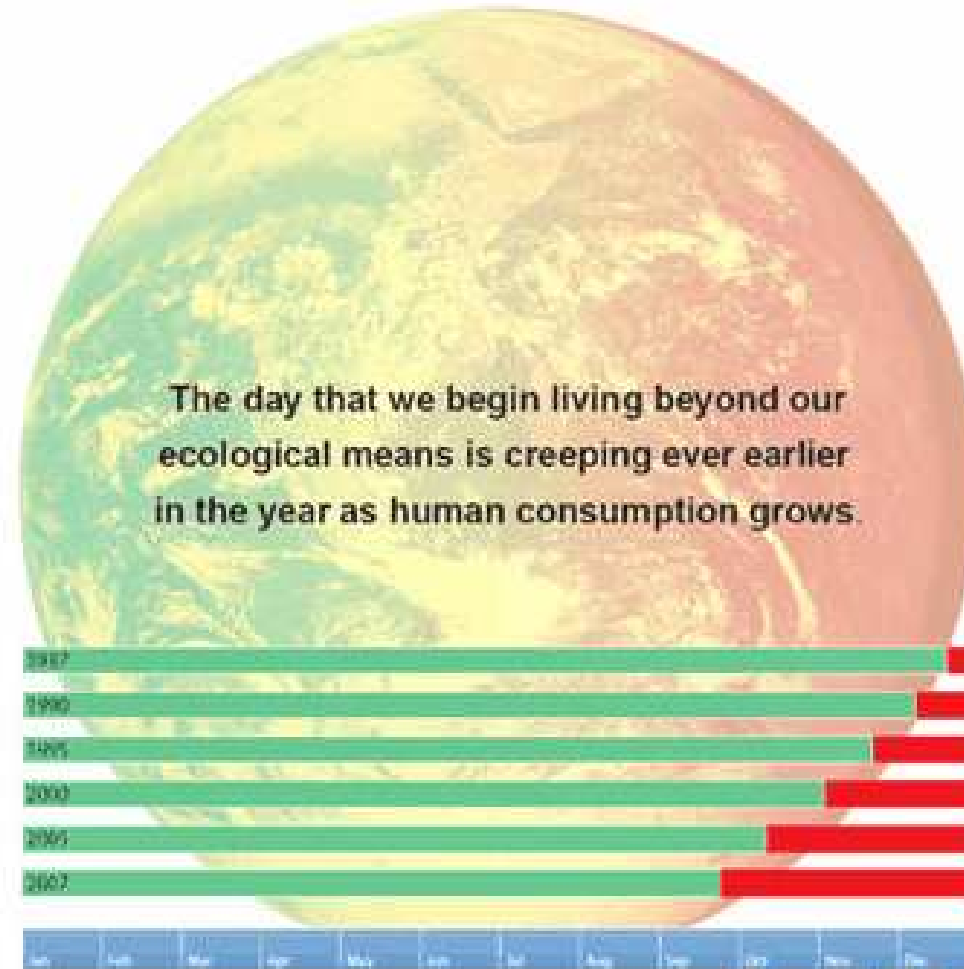

Global Footprint Network  
Advancing the Science of Sustainability

## What is Overshoot and what is causing it ?

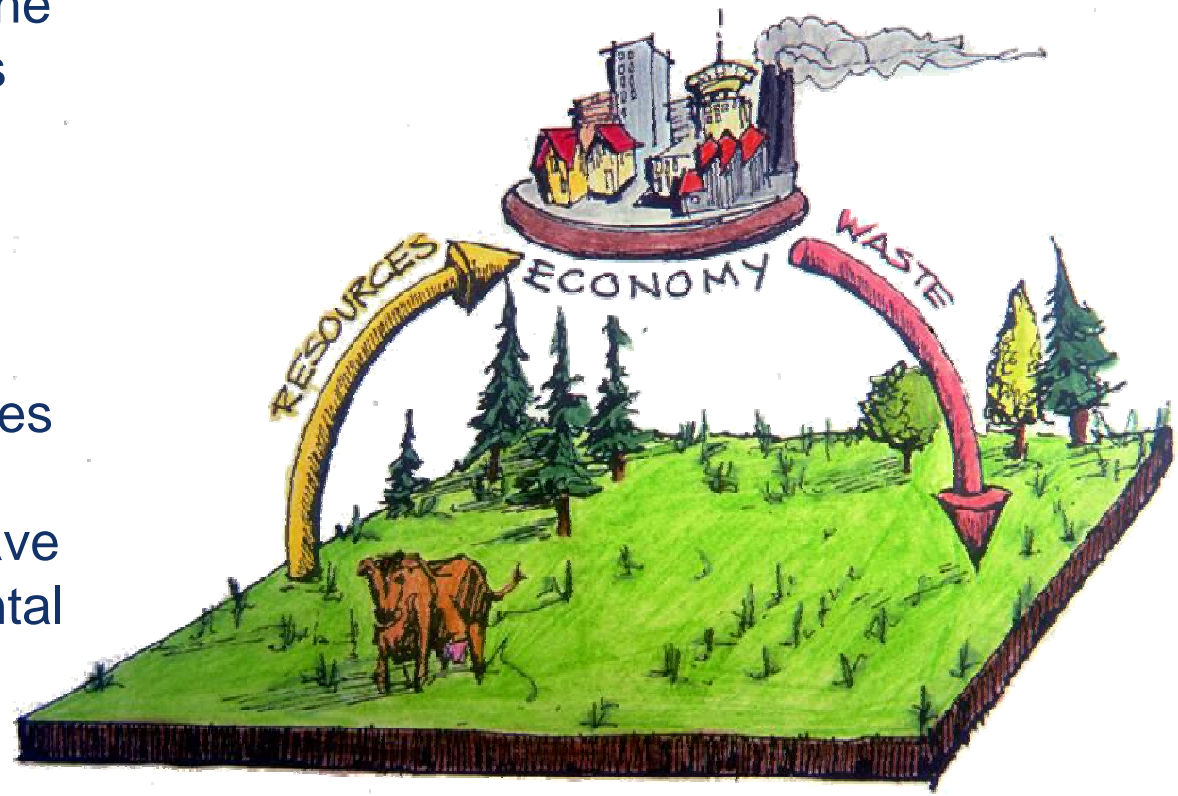

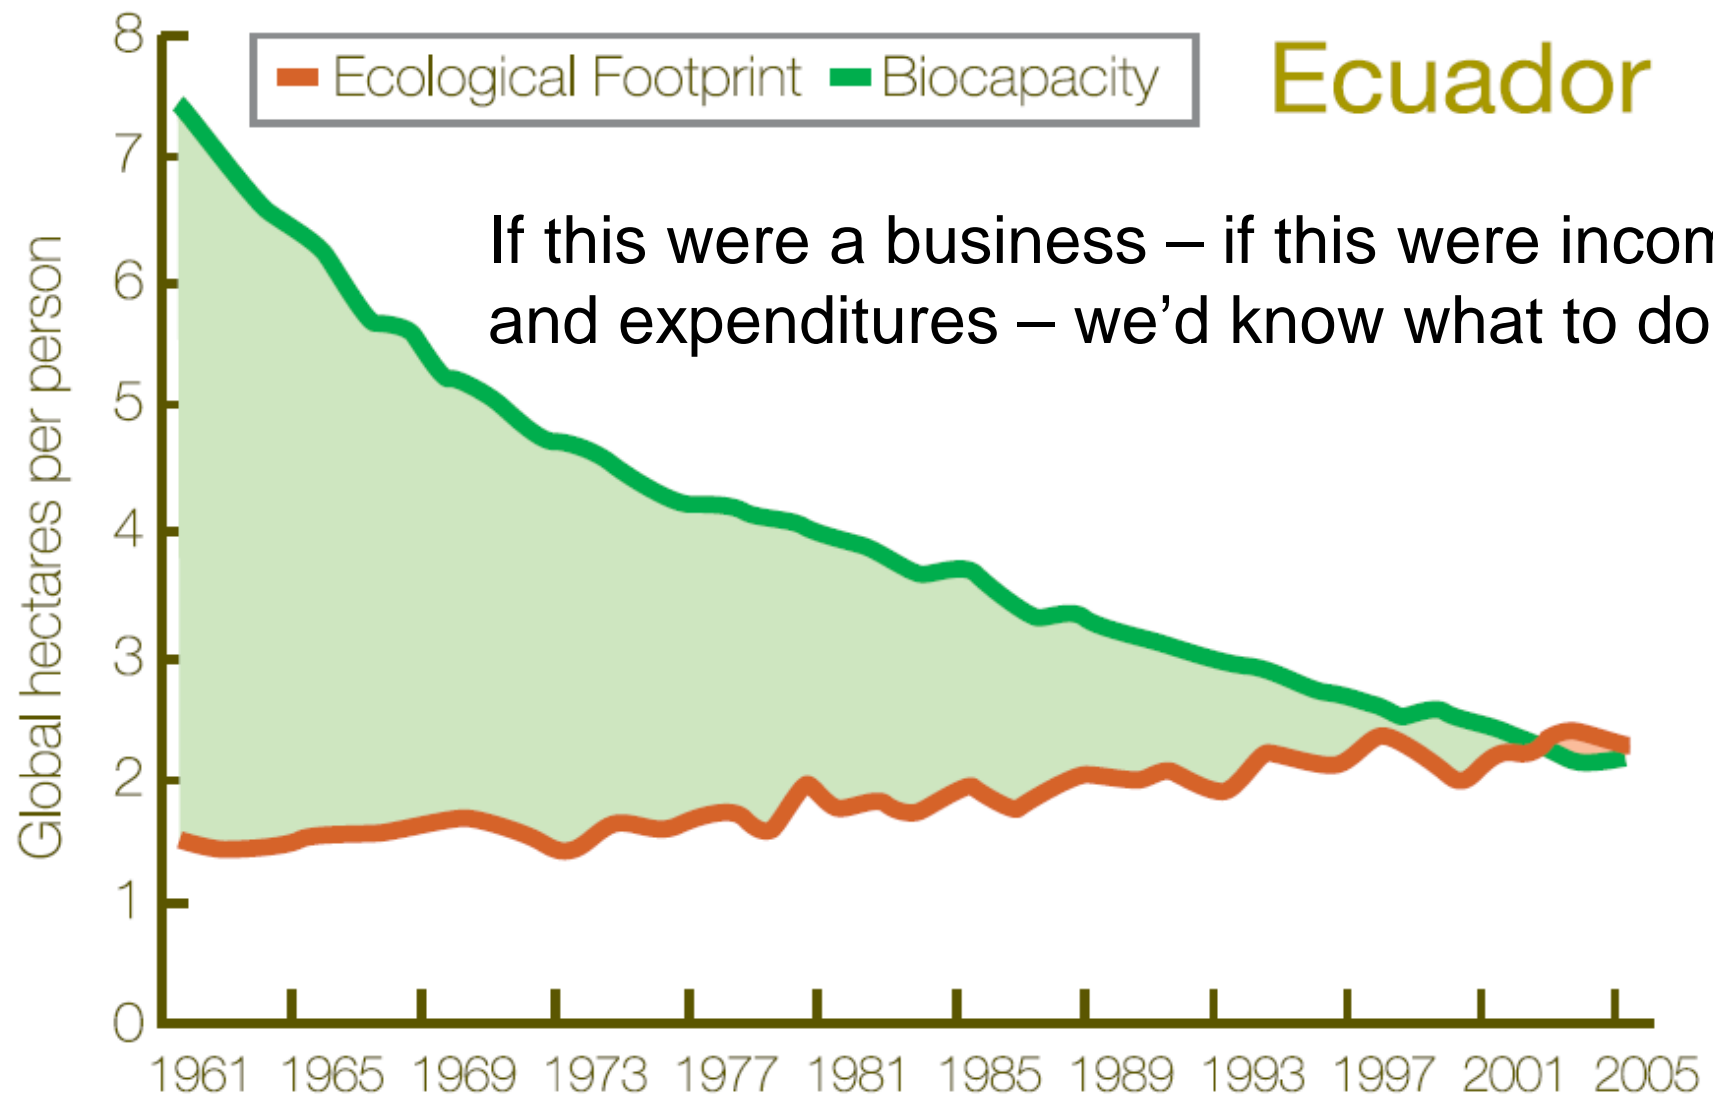

## Why tracking Overshoot is important

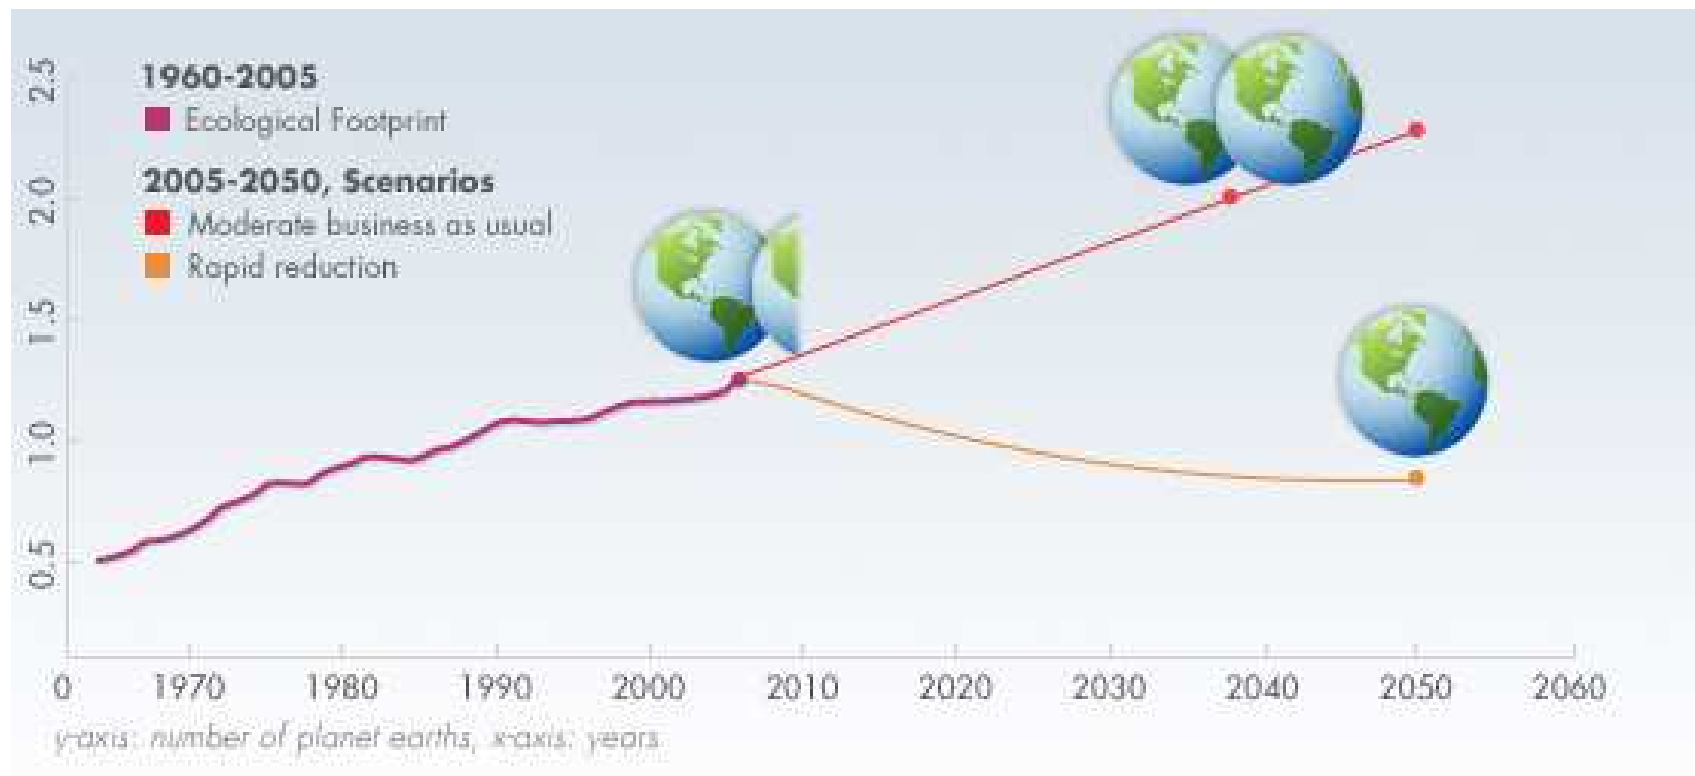

- Goods and services at the base of human societies are all supported by functioning and healthy ecosystems
- how we position ourselves compared with the ecological budget we have available is of fundamental importance

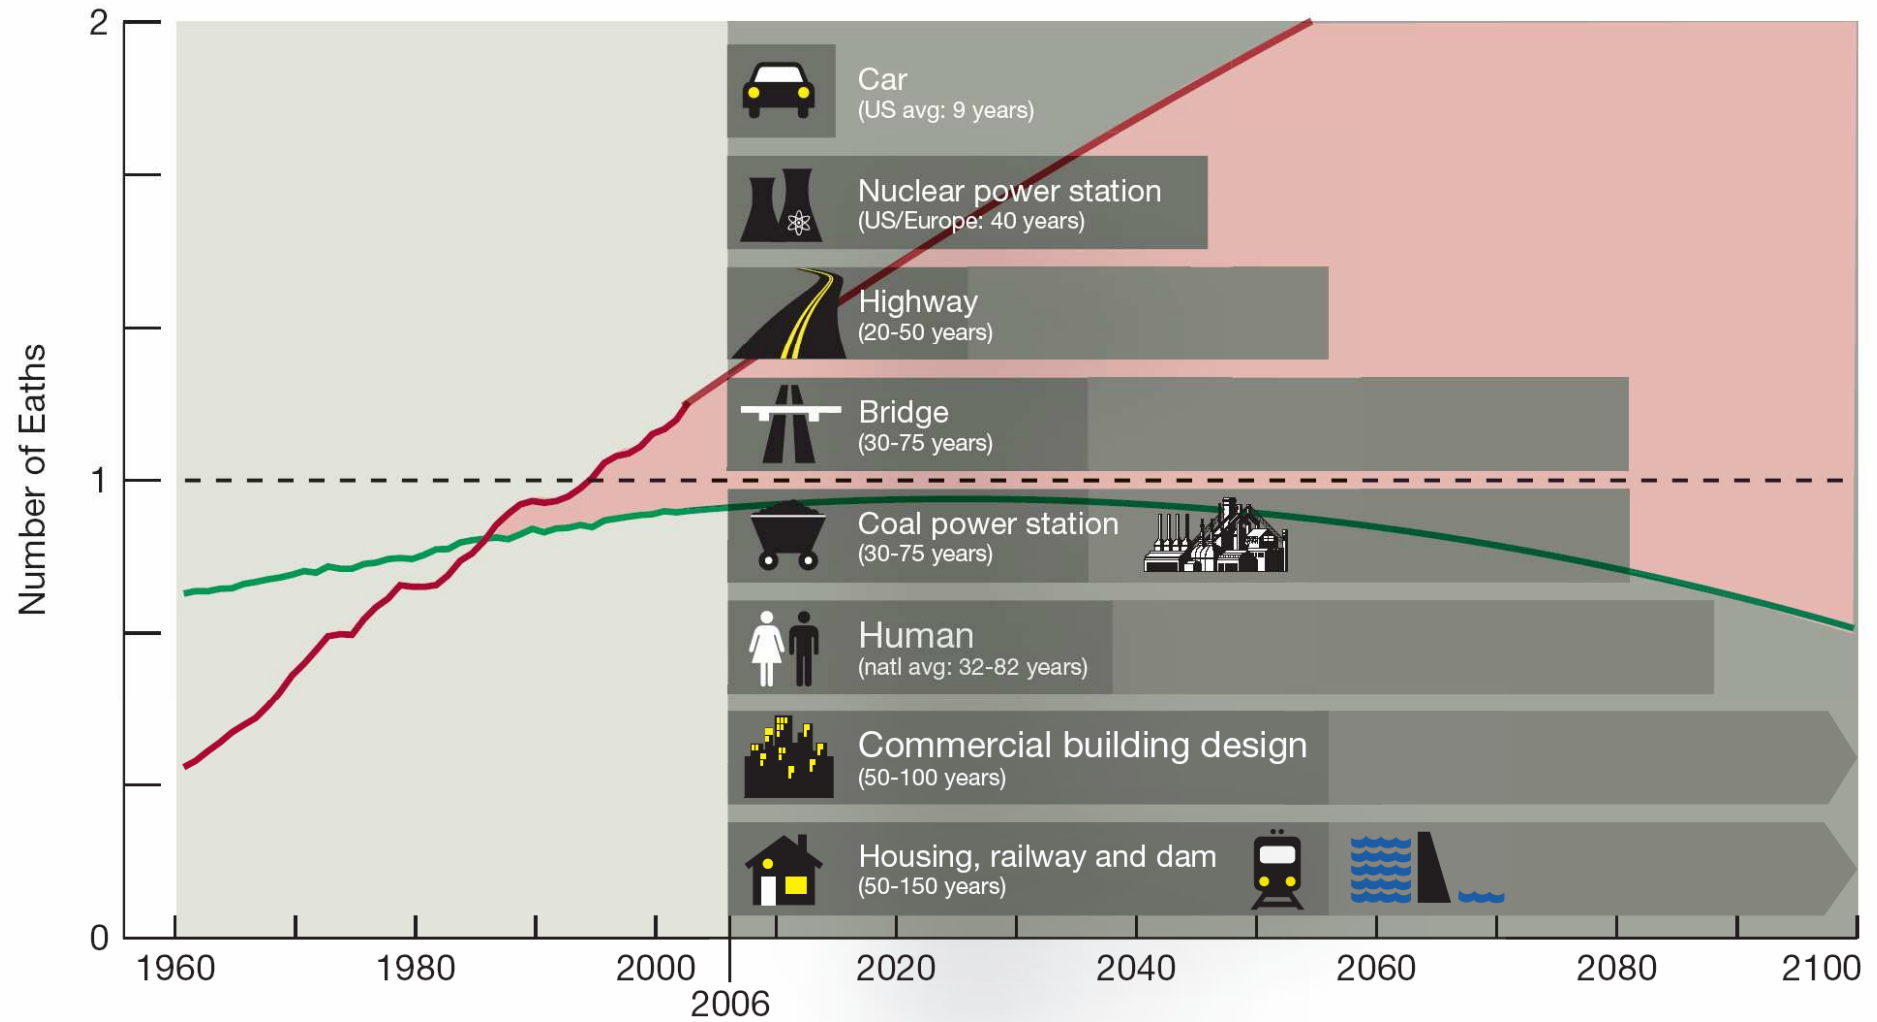

## How long can we stay in Overshoot?

**Thank you !**
