

Why a videogame?

Videogames can be either **media** or **games**, but sometimes they can be both.

When used as **media**, they may carry an idea from one place to another

when used as **games**, they can establish a set of conditions within which humans play.

form

Banoptikon is an **Online single user 3D videogame**

- Collected data from the MIGNET research project
- organized them as game elements,
- created different game spaces and
- disseminated them to the open public.

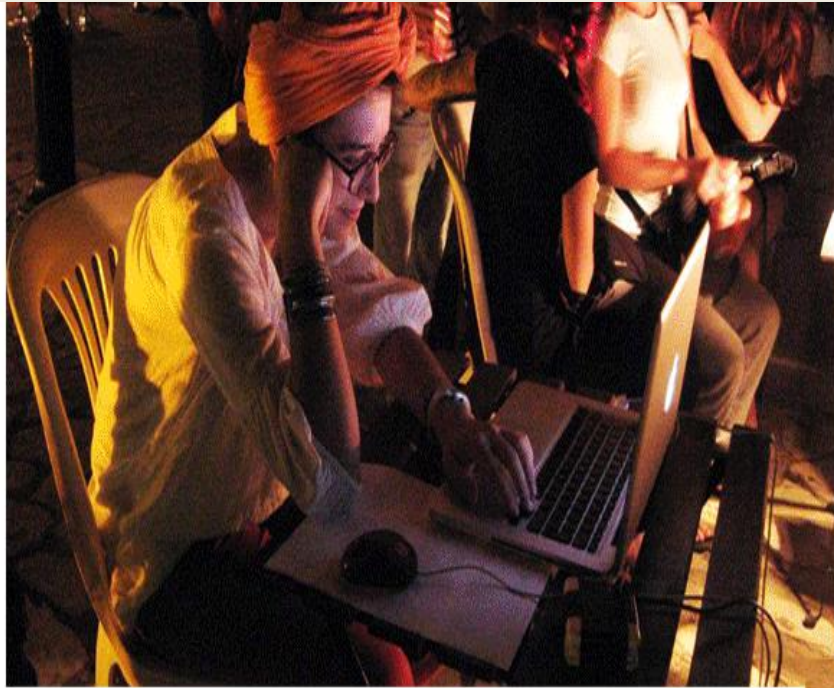

.

Dissemination online
